## Assessment Tool for a Problem-Solving (Proposal) A3

## Directions

## Items Assessed by Direct Review of the Proposal A3

Items numbered $1-23$ can be assessed without knowing the actual situation. Most items reflect descriptive content suggested in the accompanying A3 template.

Rating these items. For each item, review the A3 and assess the item using one of the four rating options. Include information in adjacent sections when assessing items - information on the left side or on the right side may be in a different order/location on a specific A3. Record the "points" ( 0 to 3 ) associated with the rating option to the right under "Item Rating."

Overall mean rating for these items. At the end, add the item "points" to calculate the overall total rating "points." Calculate the overall mean item rating by dividing the total rating points by 23 , the total number of items. (If completed on a computer, calculations are performed automatically - see below.)

## Items That Require Knowledge of the Actual Situation

Unnumbered items (noted with " $>$ ") address how well an A3 reflects the actual situation. Only individuals who are somewhat familiar with the specific context (beyond description in the A3) can assess these ten items. When these items can be rated, they assess the A3's accuracy in representing the actual situation.

Rating these items. For each item, review the A3 and:

- If you have adequate knowledge of the actual situation, assess the item using one of the four rating options.
- If you are not familiar (or not adequately familiar) with the current situation, indicate "Cannot assess."

These items are not included in aggregated mean ratings because not all raters will be familiar with the problem.

## Providing Feedback

Provide feedback to A3 authors using the item ratings, comment box for each section, and overall ratings. For "Problem Solving" A3s in development, feedback provides important formative assessments. For finished A3s, feedback explains summative/final assessments.

## Functions When Completing on a Computer

The assessment tool is a PDF fillable form that performs two functions when completed on a computer.
"Hover" for rating explanations. "Hover" your pointer over a rating option and a more detailed explanation will appear.

Entering ratings and calculating scores. Use the dropdown menu for each answer box to enter the score. For the numbered items, the total and the mean for the 23 numbered items will be calculated and appear at the end. (If numbered items are not answered, they are scored as zero in calculating the total and mean scores.)
